

THE SYNCROSTORE-SUPPLIED CHECKOUT STATION

Landi Cx20 Lite

Windows POS terminal · Built for multi-vendor retail and thrift stores

This is the checkout station we put on the counter of every Syncrostore-powered store. Dual-screen, full HD, Windows 11 IoT, built-in receipt printer. It ships pre-configured with Syncrostore — plug it in, log in, you're selling.

- **One box at the counter**

Main screen, customer-facing display, and built-in receipt printer in one footprint. No tangle of separate components.

- **Pre-configured with Syncrostore**

Every unit is imaged before shipping. Plug it in, log in, you're ringing up customers within minutes.

- **One team handles everything**

Hardware support, software setup, ongoing help — all from us. You don't call Landi. You call Syncrostore.

SUPPORTED BY SYNCROSTORE ENGINEERING

Why we picked the Landi Cx20 Lite

We tested every major POS terminal — Square, Clover, Toast hardware, the off-brand clones. The Cx20 Lite won because it does the job, doesn't lock you into a single payment processor, and the dual-screen plus built-in 80mm receipt printer means one box at checkout instead of five. For a store running 50 vendors through all day, that matters.

— *Drew, founder of Syncrostore*

What's inside

The features that matter when you're running multi-vendor retail.

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Performance that doesn't drag Intel N97 quad-core (up to 3.6 GHz) with 8GB RAM and 256GB storage. Plenty of headroom for Syncrostore plus any other software your store runs at checkout. Expandable to 16GB / 512GB.</p> | <p>15.6" Full HD touch Bright IPS panel at 1920x1080. Your team runs Syncrostore checkout, pulls reports, and looks up vendor info on a screen that holds up to an 8-hour shift.</p> |
| <p>Optional customer-facing display 10.1" second screen the customer sees during checkout. Premium version adds touch (signatures) and a QR camera (loyalty, coupons). Standard version is display-only.</p> | <p>Built-in 80mm receipt printer Thermal receipts at 200mm/s with auto-cutter. No separate receipt printer on your counter. Cx20 Lite SE drops this if you'd rather use a standalone.</p> |
| <p>Clear sound, even in a loud store Dual 5W speakers (100dB at 1m) plus dual microphones. Notifications cut through a busy Saturday — checkout chimes, payment confirmations, vendor alerts.</p> | <p>Connect anything Wi-Fi 6E + Bluetooth 5.3 + Gigabit Ethernet. USB-C, USB-A 2.0/3.0, RJ45 ethernet, RJ22 serial, RJ11 cash drawer, 3.5mm audio.</p> |
