

FOR SYNCROSTORE + SYNCROPAY CUSTOMERS

Card readers that just work

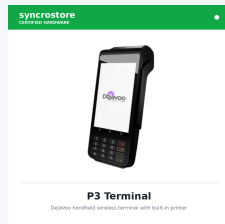

Three Dejavoo terminals for multi-vendor retail and thrift stores. Paired with your SyncroPay account, configured by our team, supported end-to-end.

If you process payments through SyncroPay, these are the three readers we recommend. Same brand, same boarding partner, same vendor support — one piece of hardware vocabulary across every checkout in your store, not a Frankenstein mix of three vendors.

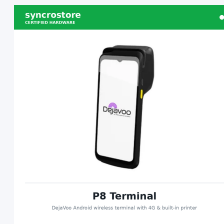

Dejavoo P1 COMPACT PINPAD

The small-footprint reader. Best for a second register, a tucked-away counter, or anywhere you need card acceptance without a full terminal eating space. Pairs to your Landi Cx20 Lite or any computer running Syncrostore.

Dejavoo P3 PORTABLE TERMINAL

Take it to the customer. Great for busy Saturdays when the line backs up, off-site events, or taking payment at the booth instead of the counter. Wireless and battery-powered with a built-in receipt printer.

Dejavoo P8 SMART ANDROID TERMINAL

The main-counter pick. 6.5" HD touchscreen, built-in printer, camera, and scanner — a full POS in your hand. Bigger screen, more features, runs alongside the Landi Cx20 Lite for your primary checkout.

SUPPORTED BY SYNCROSTORE ENGINEERING

Why we picked these three Dejavoo readers

Three models cover the situations a multi-vendor retailer or thrift store actually runs into. Your main counter (P8), a portable reader for special events or busy Saturdays (P3), and a compact pinpad for a second register that doesn't need a full terminal (P1). We'll spec the right combination during your SyncroPay onboarding, ship them pre-paired with your merchant account, and support every piece end-to-end.

— Drew, founder of Syncrostore

How it works with Syncrostore + SyncroPay

The simple version of a setup that handles a lot under the hood.

1. You move to SyncroPay.

Our team handles the merchant boarding and underwriting. Usually about two weeks end to end.

2. Your Dejavoo readers arrive pre-configured.

We image and pair each unit before shipping. No manual setup at your store.

3. They talk directly to Syncrostore.

When you ring up a sale in Syncrostore, the reader prompts the customer automatically. No separate amount entry, no manual reconciliation at end of day.

4. Settlement happens in Syncrostore.

Payouts, vendor splits, and reporting all flow through your existing Syncrostore account.

For SyncroPay rates and quote-specific terms, ask your account contact — we don't publish those publicly.

At a glance

	P1	P3	P8
Form factor	Countertop pinpad	Wireless handheld	Smart Android handheld
Screen	Small color	2.8" color	6.5" HD touch
Receipt printer	No (host-printed)	Built-in thermal	Built-in thermal

Best for	Second register, busy line	Off-site events, tableside	Main counter, full POS
Card acceptance	Chip / tap / swipe / contactless	Chip / tap / swipe / contactless	Chip / tap / swipe / contactless

What's included from Syncrostore

Merchant boarding and underwriting We open your SyncroPay merchant account and handle the paperwork. You give us the docs once, we do the rest.	Pre-configured hardware Every reader ships imaged and paired to your account. Plug it in, accept your first card.
Direct Syncrostore integration Sales ring up on Syncrostore, the reader prompts the customer, the receipt is on Syncrostore's record — no double entry.	End-to-end support Reader breaks, network hiccups, settlement question — you call us, not Dejavoo, not the processor.

Ready to talk about SyncroPay?

Fifteen-minute call. We'll walk you through SyncroPay rates, which Dejavoo readers fit your store, and the switch timeline if you're already running with another processor.
